## NAME

ciaaw − CLI for ciaaw

## SYNOPSIS

**ciaaw** [*OPTION*]... [*ELEMENT*]...

## DESCRIPTION

**ciaaw** is a command line interface which provides the atomic weights, the isotopic compositions and the nuclides atomic weights. If no element is provided the full periodic table is displayed.

## OPTIONS

**−s, −−saw**
: Get the standard atomic weight.

**−i, −−ice**
: Get the isotopic composition.

**−n, −−naw**
: Get the nuclide atomic weight.

**−m, −−mu**
: Get the molar masses in g/mol by multiplying the atomic weights by the molar mass constant Mu.

**−c, −−colnames**
: Show the headers in the outputs.

**−M, −−molarmass SPECIES**
: Compute the molar mass of the given species.

**−u, −−usage**
: Show usage text and exit.

**−v,−−version**
: Show version information and exit.

**−h, −−help**
: Show help text and exit.

## EXAMPLE

Minimal example

```
ciaaw
ciaaw H C B O Zr Nb --saw --ice --naw --colnames
ciaaw H C B O Zr Nb -sinc
```
